THE BRAND I TRUST

Being an integral part of  I can assure you of its high quality standards and its dedication to serve you. GM's newest products in the category of fans and innovation such as Excel 35, Odyssey, Embassy, Orisys and more have a profound potential of fully augmenting your living experiences. I, therefore, insist on making the elite choice in technological innovations for your cherished homes and empower you to relish the luxury it concludes.

- Suniel Shetty

Introduction

Everything began with a dream to make comfort a reality. With passion, diligence, commitment and honesty we created wonderful things for a better world. We began with the switches, moving on to automation, progressively towards LEDs, gradually touching every metaphor of a good smart home. And now we are proud to introduce ceiling fans that will carry the GM logo.

With a proper research in design and material, GM ceiling fan range has grown with a design aesthetic of clean lines, correct proportions and a less-is-more philosophy. We use crisp, precision metalwork by artisans with tremendous experience in the industry. Some of the products would pass through the hands of metal craftsmen, metal finishers before they are presented, to our customers.

We believe in sustainability based on the simple premise that if something is well made and beautiful it will have a long and useful life and to this end believe that by sourcing local materials and components we are supporting our environment, community and economy. We continue to follow our aspiration to provide a product that sells across the world because it satisfies a demand for high quality and that will last as a mark of fine innovation and technology.

How to select a perfect ceiling fan for you?

Visit our website www.gmmodular.com or go to any nearest GM showroom, or a local shop dealing in GM fans.

1. Scroll through our products and their features online, or read through our catalogue.
2. Have a proper understanding of your requirement and choose a GM fan as per your need.
3. Choose from the categories namely ceiling, ventilation & exhaust, pedestal, wall, table, personal and industrial fans.
4. Our feature categories ranges from exquisite design, added extra copper, anti-dust fans, high-speed fans, BLDC motor technology, point anywhere RF remote technology, sleek IR remotes, 50% savings on electricity costs, high air delivery, wide voltage range, thermal overload protectors, low noise fans, rustproof body, 360 degree oscillation to energy efficient motor and much more.
5. Note that all GM fans are functionally modern and externally appealing, and suit all interiors perfectly.
6. GM fans come in various shape, sizes, colours and design to match your assorted preferences.
7. Airmate, Zephyr are our award winning fans, and you can select them without thinking twice!

Things to consider while selecting a Ceiling Fan

How to select your fan?

Sweep- Air delivery is proportional to its sweep. That means the more the sweep, the better the air delivery. But, remember that the area also decides its efficiency.

Speed (RPM)	Air Delivery (CMM)
315	240 ✓

Higher RPM does not mean higher air flow. Air flow/Air delivery is the only point of comparison in selecting a ceiling fan.

Sweep Size	Room Size
600mm (24")	Small shop, cabin, Kitchen, Powder Room
750mm (30")	06 x 10ft
900mm (36")	07 x 10ft
1050mm (42")	10 x 10ft
1200mm (48")	12 x 13ft
1300mm (52")	13 x 14ft
1400mm (56")	14 x 15ft

Optimal Height

Ceiling Height- Use ceiling fans for rooms with tall ceilings, and choose personal or wall fans, for rooms with low height ceilings.

Energy Efficiency

Lower electricity consumption means higher savings. The more the stars, better savings.

Contemporary living dynamics

IR Remote

The iF Design Award is recognized as a symbol of design excellence around the world. It aims to draw attention to particularly well-designed industrial products. iF International Forum Design GmbH is one of the world's most celebrated and valued design competitions.

Freshness in more ways than one!

Xenix PRO ventilating fan is amazingly durable as it comprises a strong metal body and a thick powder coat finish. It has a protective guard on it, to prevent birds and foreign objects from entering. The special ball bearing feature keep the operation silent. It is primarily used in kitchens and washrooms of hotels and restaurants.

The Xenix two-way ventilating fan with its unique reversible feature, grants double utility. While the advanced bush bearing promises exceptional operational assistance, the sturdy metal body with four cutting-edge blades and powerful motor assure superior suction capacity and longevity.

- Glossy Finish
- With Double ball bearing
- Enclosed type Powerful motor which prevents entering of fumes, oil, dust on motor winding
- Guard for protection from birds and foreign objects
- Sturdy metal body with 4 metal blades
- High air thrust & Hub based design
- Earthing provision for human safety
