## Our green quest continues..

**A**t RASIK FOILS- we care and nurture our environment by placing ethical and organic practices into operation – ensuring the needs of the environment works hand in hand with all of our manufacturing processes. Our team and management strives to achieve the highest standards of environmental safety and preservation. We are pioneers in the usage of ecologically pure products in India and in using the most cautious methods in production to help protect the environment.

*This is our commitment.*

### Ecological advantages of our Paper

Our Metallized paper are a monomaterial. Most of our metallized papers can be recycled

Our paper requires 200-400 times less aluminum partical which is easily recycled

Our Metallized papers don't 'contaminate' recyclable primary packaging – even when it's laminated to materials such as board and paper

Our paper substrate is made from controlled wood issued from forests that are certified as responsibly managed to preserve biological diversity and benefits to local people

Our plants run with an exceptionally low waste ratio: any unused, raw material coming out from the metallizing process is simply recycled

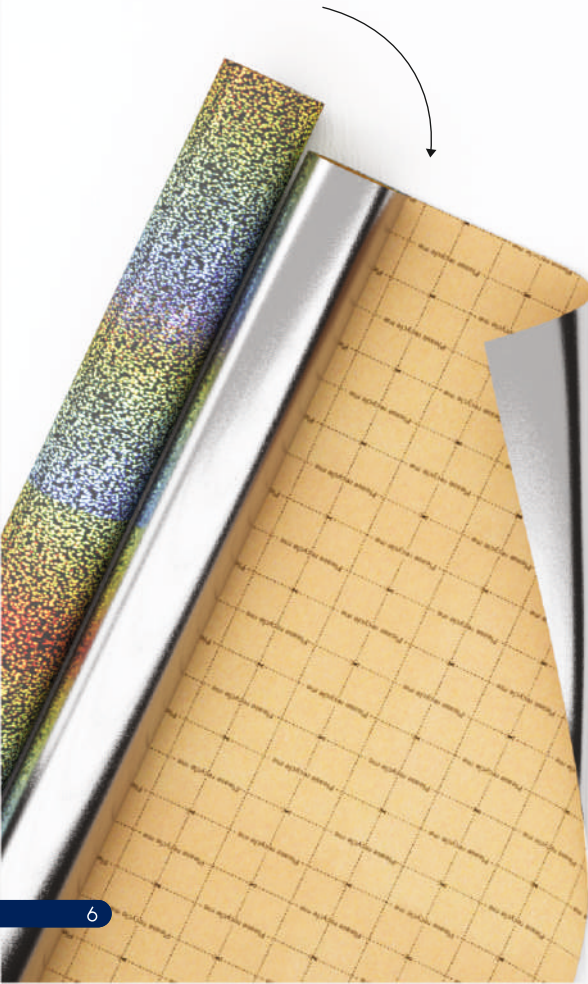

## Kraft Paper

The paper that we use is 100% recyclable FSC approved Kraft paper - available in brown, white and a variety of colours.

## Transfer Metallic & Holographic Paper

This technique is specially developed by Rasik Foils and it does not have any plastic film lamination. It is easily recyclable and appealing in nature with kraft paper as a base.

## Water base colours and finishing

We use environmental friendly water base inks to print our gift wraps.

## Less carbon foot print

We use natural gas and not electricity to run our machineries and that means, we save more units of electricity which results in less carbon emissions.

## *Eco-Packaging* We go Green!

Rasik Foils prides itself on our business ethics and responsibilities. Our working methods ensure a positive impact to the environment.

Our business uses natural gas and not electricity to run our machines which means, we save more units of electricity which results in less carbon emissions.

Our methods and practices reduce the carbon footprint in the environment.

In addition to our Eco materials development, striving to reduce waste and packaging is our mission.

To this end we have developed environmentally friendly packaging solutions, which includes roll wraps which do not require any shrink film. Our eco products can also have recyclable FSC labels, Kraft paper cartons , boxes etc.

All packaging from 100% recycled and recyclable materials.

We ensure there is Nil or reduced plastic in all our packaging, depending upon customer product specifications.

**KARMA**  
EXPORTS

Our Environmentally friendly products are not just limited to one product but are an important feature throughout our diverse range of paper products, for example - roll wrap , gift bags -that are kraft based and are organic and have an earthy feel, our tags, kraft tissue paper and boxes. A major portion of our wrapping paper is 100% recycled FSC approved paper.

## *Eco friendly materials reliability*

Rasik Foils uses optimal sustainable solutions, which enables perfect product engineering while providing maximum care to the environment.

We offer ECO innovation to all of our speciality treatments, covering all of our materials and finishes. All of these products have plastic removed entirely and are made from sustainable or recycled material. They are 100% recyclable through all known recycling streams.

*"Our paper is easily  
recyclable  
in the environment".*

## Finishes

Speciality treatments can be offered within our eco range of products like our new glitter range which is 100% biodegradable and compostable, hot foil, transfer metallic / holographic papers , embossing finishes , metallic inks and foam flocking exclusive to our RECO collection.

## Designs elements

Rasik Foils balances sustainability beautifully with the aesthetics of the design and feel of the product. This is combined with limiting any impact to mother nature and without compromising our luxurious design developments.
